"Rational Ventilation of Stationary Working Places for Electric Welding," G. A. Iofinov,
Ye. M. El'terman, CandS Tech Sci

Avtogen Delo, No 12, pp 18, 19

Assuming that conventional exhaust hoods do not satisfy conditions of electric welding operations, since they do not divert flow of heated contaminated air from vertical direction and remove air only after it passes through welder's breathing zone, authors suggest ventilation system design in form of swinging double-sided panel. Drawing is given and performance discussed.

"Cooling Flake-Sensitive Steel after Hot Mechanical Working," S. A. Iofinov, Engg, Giprokht, 4 pp

"Steel" No 3

National and foreign studies on regulation of cooling of flake-sensitive steel after rolling or forging show that it is practical to substitute heating aggregates for nonheating pits. These may be tunnel-shaped, pit or chamber furnaces. Thermal processing of metals in these types of furnaces with strict control over the process will prevent formation of flaking.

TITLE: Manufacture of thin-walled nichrome tubes. Class 7, No. 182661

SOURCE: Izobreteniya, promyshlennyye obraztsy, tovarnyye znaki, no. 12, 1966, 19

TOPIC TAGS: nichrome, nickel alloy, chromium containing alloy, metal tube, ~~manufacture~~, thin wall tube

ABSTRACT: This Author Certificate introduces a method for manufacturing thin-walled nichrome (Ni-Cr alloy) tubes which includes drawing and process annealings in a vacuum. To obtain tubes with a wall thickness of about 0.01 mm and tolerances within 0.002—0.003 mm and to increase the yield, the final drawing passes are done on an aluminum mandrel which is then dissolved in an alkali solution. Motion-picture film Infrachrome. E. Iohs, Soviet.
Foto 1936, No. 11, 19-20; Chem. Zentr. 1940, II, 853.—
The Russian film Infrachrome shows a sensitivity in the
near-infrared region up to 730 mμ with a very slight sen-
sitivity in the green portion of the spectrum. It is espe-
cially suitable for obtaining "night effects" with daylight
illumination. The general principles of infrared photog-
raphy are discussed. M. G. Moore

TOPIS, YE. [A-]

Fotograficheskaya Obrabotka
Tsvetnykh Kinof il 1 Nov. (Photographic Development of Motion Picture Films)
Moskva, Goskinoizdat, 1950.

151 P. Illus., Diags., Tables.

An attempt to theorize experiences of collective workers in developing colored films. Author explains basic problems of photographic developing of three-coat films and emphasizes in preface that his book could be used as a manual for film operators and students of the 'VGIK'. Film studios and laboratories, etc.

IOFIS, Ye.A.

Tech. Ed.: None

Editor-in-Chief: None

Appraiser: None

Text Data

Coverage: This book brings brief information on photographic topics, such as: types of cameras, objectives and lenses, different kinds of light-sensitive materials for negatives and positives, necessary information as to methods of exposure, proper use of light meters, aperture, and lastly laboratory processings of photographic material. The book is for amateur photographers, who already have some knowledge on photography but want to improve their work.
